

DESCRIPTION

Aspiring software professional with strong skills in Java, Python, JavaScript, backend development and databases, with hands-on experience building full-stack and AI-powered applications. Eager to apply problem-solving skills, learn new technologies and contribute to impactful software solutions.

EDUCATION

Degree	Specialization	Institute	Year	CPI
MCA	Computer Science & Applications	REVA University	August 2026	9.04
BSC	Mathematics, Statistics & Computer Science	REVA University	July 2024	8.90
12th	Physics, Chemistry, Mathematics & Biology	REVA Independent PU College	July 2021	87.83%
10th	State Board	Allwin Public School	April 2019	84.96%

PROJECTS

- Trip On - Travel & Tourist Guide Website
 - Developed a full-stack travel and tourism website using HTML, CSS, JavaScript, PHP and MySQL with secure authentication, hotel booking, interactive maps and responsive design.
- Skill Forecasting in Esports
 - Built a machine learning pipeline to predict competitive match outcomes from historical performance data, achieving 88.9% accuracy and 0.967 ROC-AUC using multiple classification models.
- AI Chatbot Interface Using Google Gemini API
 - Developed a Java Swing-based AI chatbot integrating Google Gemini API with multithreading, secure authentication and persistent chat history via JDBC and MySQL.
- The Sirelle Co – AI-Integrated Private Label E-Commerce Platform
 - Developed a mobile-based private-label e-commerce application integrating lightweight AI modules for intelligent product discovery, confusion detection and predictive navigation within a scalable modular architecture.
- Dhruv Star Academy – Attendance and Study Management System
 - Built a full-stack student monitoring system with Node.js, Express.js and SQLite, implementing JWT-based authentication, role-based access, attendance management, study-session tracking, image uploads, and teacher analytics dashboards for monitoring student progress.
- Eduvirse - AI Powered Digital Lecture Library Platform
 - Engineered the backend using Express.js and integrated Supabase for persistent data management, supporting authentication, course and lecture workflows, API communication, and scalable storage architecture within a React + Vite full-stack application.

SKILLS

- Technical Skills : Python, Java, C++, SQL, Artificial Intelligence, Machine Learning, Advanced DBMS, Data Structures, Object-Oriented Programming, Web Development, Javascript, Software Engineering & Cyber Security
- Soft Skills : Communication, Problem-Solving, Team Collaboration, Adaptability, Time Management, Leadership, Critical Thinking, Creativity, Quick Learning, Positive Attitude & Punctual
- Tools & Technologies : VS Code, Git, Github, Docker, Google Colab, Scikit-learn, Postman, MySQL, Django, Linux, Jupyter Notebook, Supabase, PostgreSQL, LaTeX, VMware, Node.js, Express.js, React.js, LangChain, Hugging Face, Canva & Notion
- Languages : English, Kannada, Hindi & Telugu

EXTRA-CURRICULAR ACHIEVEMENTS / ACTIVITIES

- Member of REVA's professional dance crew Ignite and multiple competition wins.
- Attended multiple seminars, conferences and volunteered for events and also Provided academic tutoring to school students across core subjects.
- Awarded Merit Excellence in Academics (2019) and Best Cultural Performer (2021).
- Content creator capturing and creating moments through vlogs and social media.

CERTIFICATIONS

- Cisco Certified Support Technician Cybersecurity
- Pragati: Path to Future – Cohort 6
- CODE TO CLOUD: A DEVOPS & DEPLOYMENT POWER BOOTCAMP
- Artificial Intelligence Foundation Certification
- DJANGO MASTERY: FROM BASICS TO DEPLOYMENT Cisco Certified Support Technician Cybersecurity
- BACKEND and AI DEVELOPER Certificate

INTERNSHIP

- NC SQUAREE ED TECH PVT.LTD - Backend and AI Developer
PROJECT NAME : EDUVIRSE – AI Powered Digital Lecture Library Platform
 - Developed Node.js and Express.js backend APIs for authentication, course management, lectures, evaluation, and progress tracking.
 - Designed PostgreSQL schemas using Supabase and integrated Supabase Storage for lecture videos, answer sheets, and file management.
 - Implemented AI-powered evaluation using OCR, semantic search, RAG, and LLMs for answer extraction, question matching, grading, and confidence scoring.
 - Integrated AI models for handwriting recognition, text extraction, semantic evaluation, and explainable grading workflows.
 - Tested REST APIs with Postman and managed code using Git and GitHub while collaborating with the development team.

RESEARCH PAPER

- Hybrid LSTM and Rule-Based Fusion for Emotion-Aware Gesture-Controlled Multimedia Interfaces
 - Designed a multimodal AI system combining BiLSTM for emotion recognition and CNN-LSTM for gesture recognition using facial landmarks, speech MFCCs, and MediaPipe hand keypoints.
 - Developed a rule-based fusion engine to map emotion-gesture combinations to real-time multimedia actions, evaluated using RAVDESS, EMOTIC, and Jester datasets, achieving 94.6 accuracy and 0.946 F1-score.
 - Implemented and evaluated the system using Python, PyTorch, TensorFlow, OpenCV, and MediaPipe, achieving real-time performance of up to 28 FPS.
